Source: design/ui-prototype.html, 23 October 2026. All people, numbers and conversations are fictional. Hindi and Marathi lines need native-speaker review.

Live call: Help me say

Home screen, and a live call where a few words become a polite sentence the user approves before it is spoken.

Home
Favourites remember each contact's language and how you like to talk with them.

Live call
Three ways to talk in one dock. Hearing options top right: captions, clear voice, read in English.

Restart pharmacy call

Try a scam call

Try each way of talking

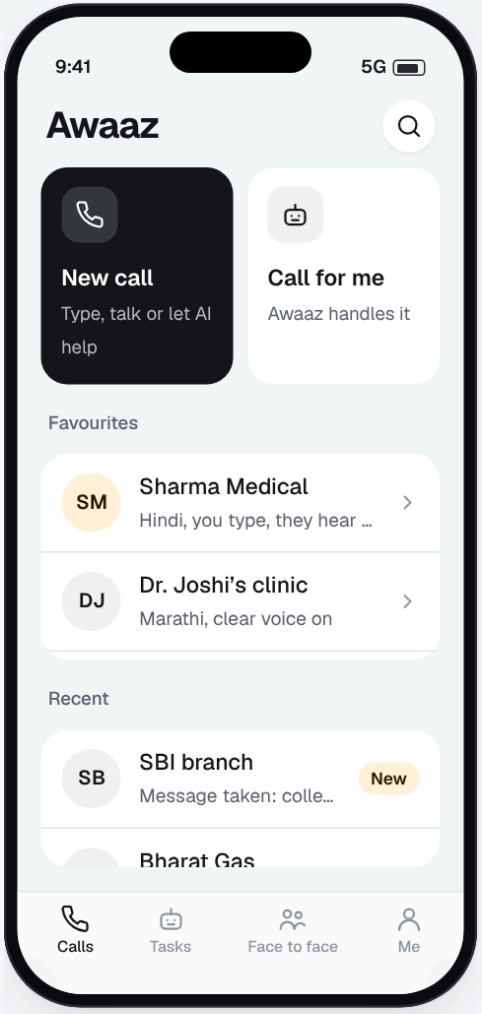

- **Type.** Tap a suggested reply or type; the pharmacist hears it in your voice.
- **My voice.** For deaf people who speak: tap "Hold to talk" and talk normally. You still read their replies as captions.
- **Help me say.** Type a few words like "delivery?" and AI drafts a polite sentence. Nothing is said until you tap Say it.

Also in this screen

- **Number chips** for prices and times, tap to save.
- **Please hold.** Pause typing for 5 seconds and Awaaz tells them you're typing.
- **Ask again** politely asks them to repeat.
- **Scam shield** blocks reading out OTPs.

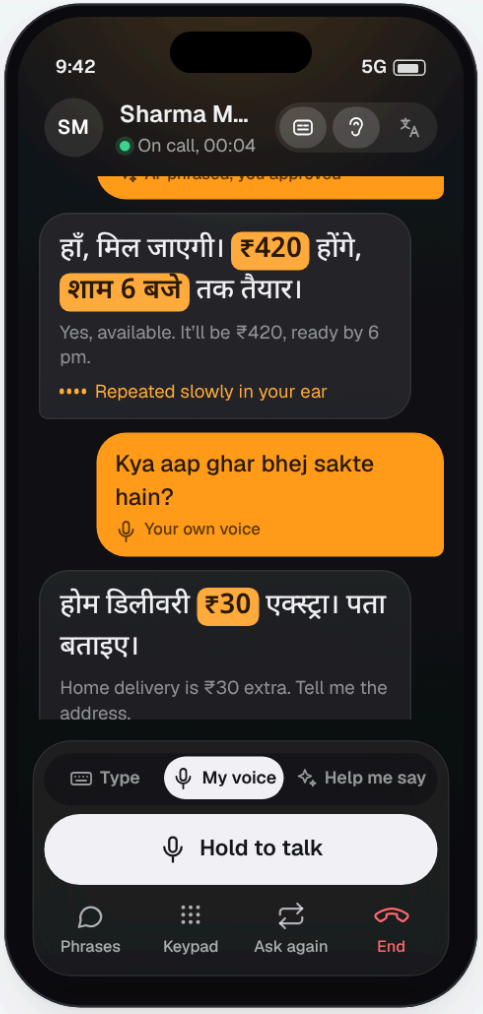

Live call: my own voice with clear voice

Deaf users who speak use their own voice and read replies; clear voice can be layered on.

Home

Favourites remember each contact's language and how you like to talk with them.

Live call

Three ways to talk in one dock. Hearing options top right: captions, clear voice, read in English.

Also in this screen

- **Number chips** for prices and times, tap to save.
- **Please hold.** Pause typing for 5 seconds and Awaaz tells them you're typing.
- **Ask again** politely asks them to repeat.
- **Scam shield** blocks reading out OTPs.

Live call: scam shield

An OTP request triggers a warning and blocks Awaaz from reading out digits.

Home
Favourites remember each contact's language and how you like to talk with them.

- **Ask again** politely asks them to repeat.
- **Scam shield** blocks reading out OTPs.

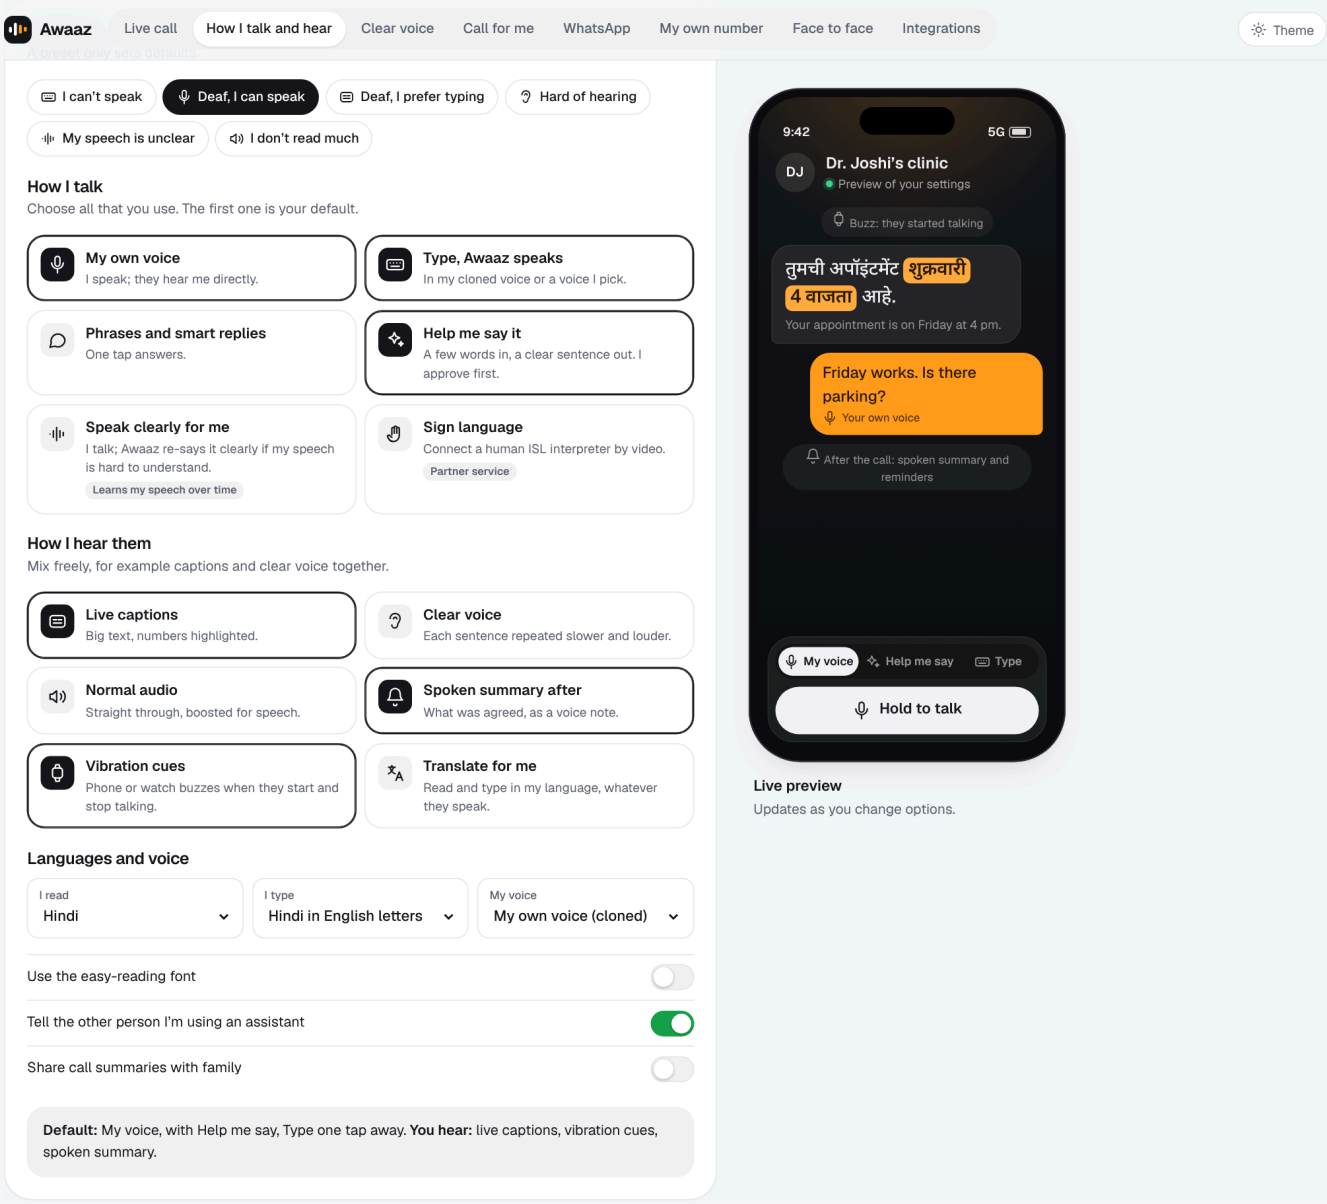

How I talk and hear: “I can’t speak”

Presets set defaults; every option can be mixed. The phone shows a live preview.

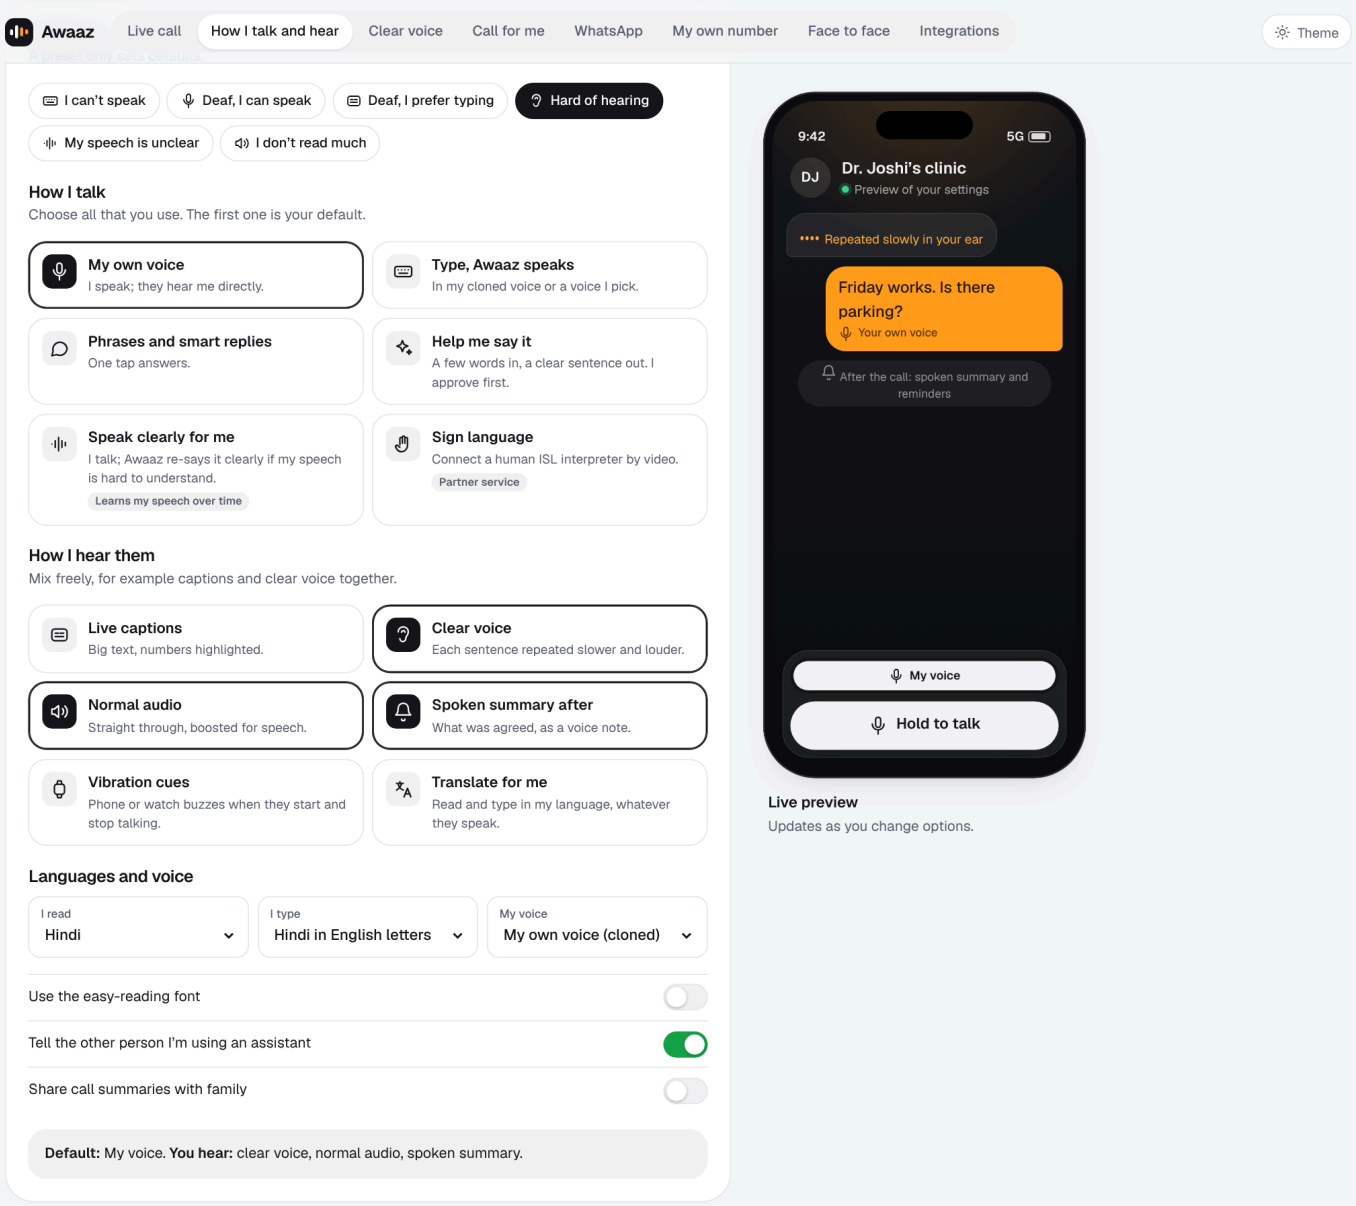

How I talk and hear: “Deaf, I can speak”

Own voice and Help me say for talking; captions, vibration and summary for hearing.

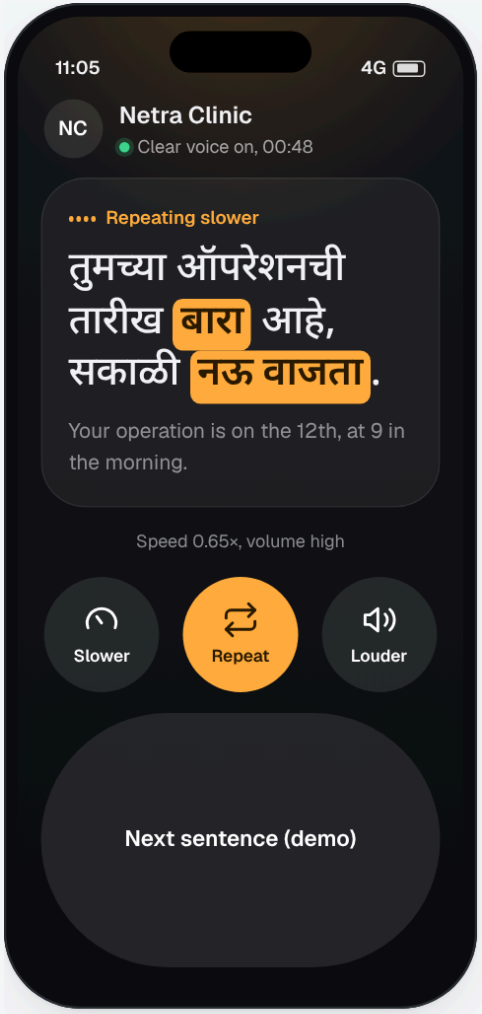

How I talk and hear: “Hard of hearing”

Own voice for talking; clear voice and normal audio for hearing.

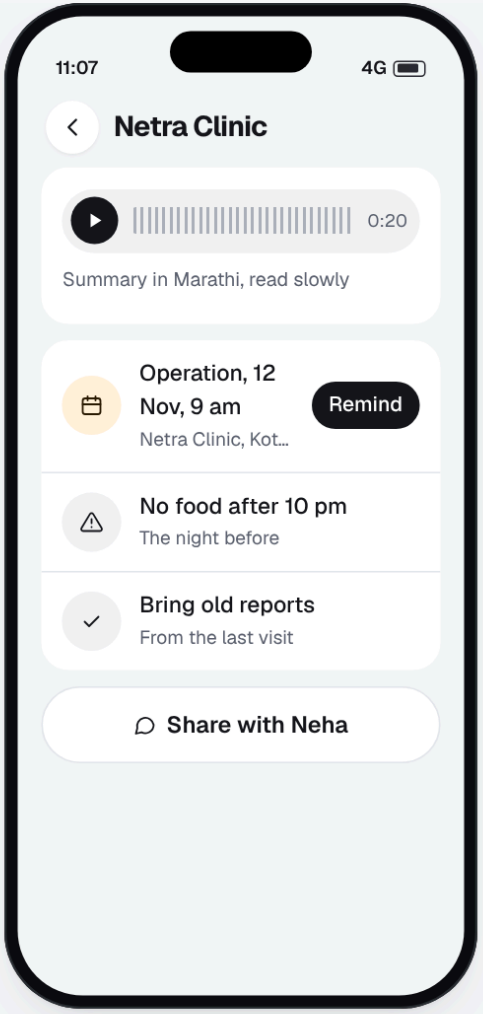

Clear voice

Each sentence repeated slower and louder; after the call, facts with reminders and a spoken summary.

During the call
Captions are optional; the repeat is the main thing.

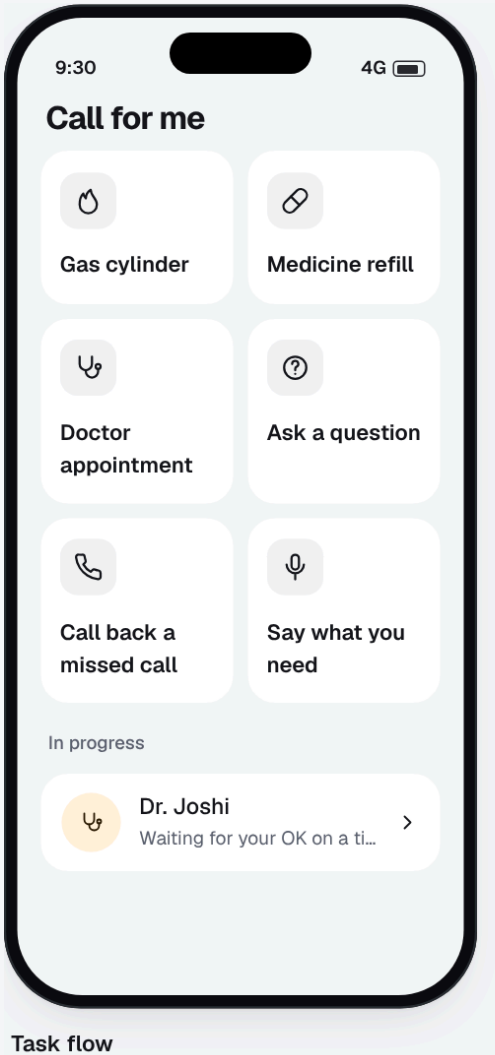

After the call
Key facts as rows with one-tap reminders, plus a spoken summary.

How it works

- **Your phone rings** from Awaaz, or you call through the app with headphones or hearing aids.
- **Exact words.** Awaaz repeats what they said, only translated if you asked. Numbers, dates and names never change.
- **They hear a soft tone** during the repeat, so they pause.
- **Voice commands** work in Hindi, Marathi and English: “phir se”, “dheere”, “number kya tha”.

Call for me: choose a task

Picture-first task tiles and tasks in progress.

Task flow

Tap through: choose, limits, live progress, approval, result.

What the agent may and may not do

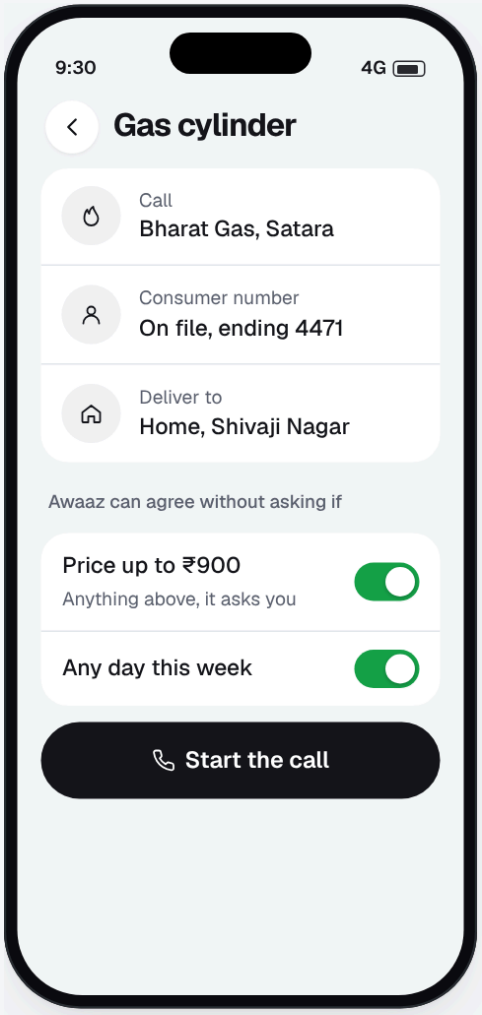

- **Opens honestly:** “I’m an assistant calling on behalf of Shankar More, who is deaf.”
- **Shares only** the facts on the task: consumer number, address, medicine name.
- **Asks you first** before agreeing to a price, date or change outside your limits.
- **Never** shares OTPs, PINs or card numbers, and never agrees to pay.

Start it from anywhere

- The app, a WhatsApp message to the Awaaz bot, or a voice note.
- Results come back in the app and on WhatsApp.

Call for me: limits

Facts on file and limits Awaaz can agree to without asking.

Task flow

Tap through: choose, limits, live progress, approval, result.

What the agent may and may not do

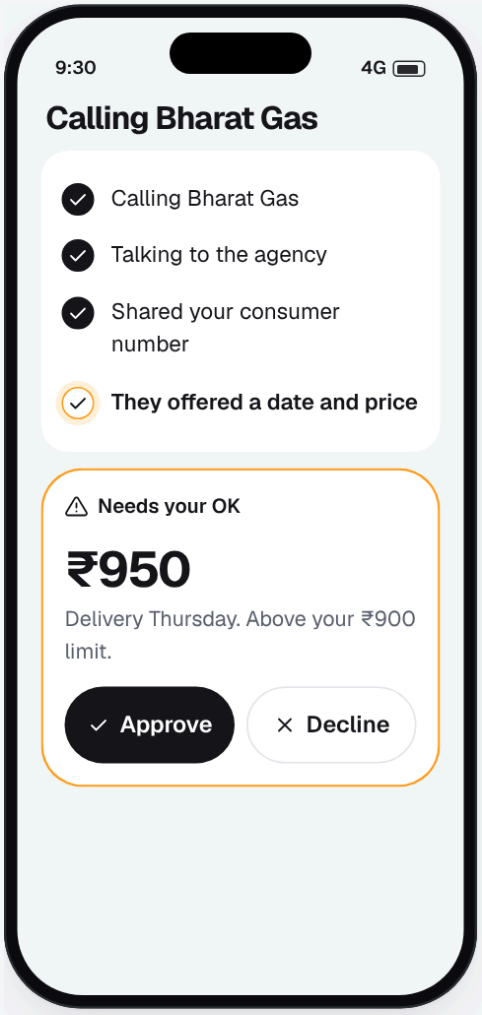

- **Opens honestly:** “I’m an assistant calling on behalf of Shankar More, who is deaf.”
- **Shares only** the facts on the task: consumer number, address, medicine name.
- **Asks you first** before agreeing to a price, date or change outside your limits.
- **Never** shares OTPs, PINs or card numbers, and never agrees to pay.

Start it from anywhere

- The app, a WhatsApp message to the Awaaz bot, or a voice note.
- Results come back in the app and on WhatsApp.

Call for me: approval

Anything outside the limits waits for the user's OK.

Task flow

Tap through: choose, limits, live progress, approval, result.

What the agent may and may not do

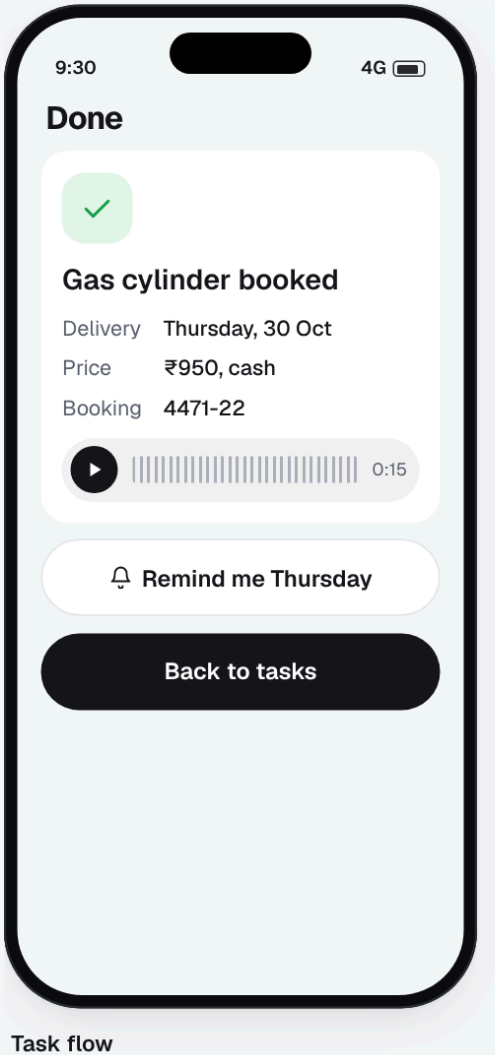

- **Opens honestly:** "I'm an assistant calling on behalf of Shankar More, who is deaf."
- **Shares only** the facts on the task: consumer number, address, medicine name.
- **Asks you first** before agreeing to a price, date or change outside your limits.
- **Never** shares OTPs, PINs or card numbers, and never agrees to pay.

Start it from anywhere

- The app, a WhatsApp message to the Awaaz bot, or a voice note.
- Results come back in the app and on WhatsApp.

Call for me: result

Result card with booking details, voice note and reminder.

Task flow

Tap through: choose, limits, live progress, approval, result.

What the agent may and may not do

- **Opens honestly:** “I’m an assistant calling on behalf of Shankar More, who is deaf.”
- **Shares only** the facts on the task: consumer number, address, medicine name.
- **Asks you first** before agreeing to a price, date or change outside your limits.
- **Never** shares OTPs, PINs or card numbers, and never agrees to pay.

Start it from anywhere

- The app, a WhatsApp message to the Awaaz bot, or a voice note.
- Results come back in the app and on WhatsApp.

WhatsApp bot

Live relay in chat, voice notes both ways, and WhatsApp calling with a share link.

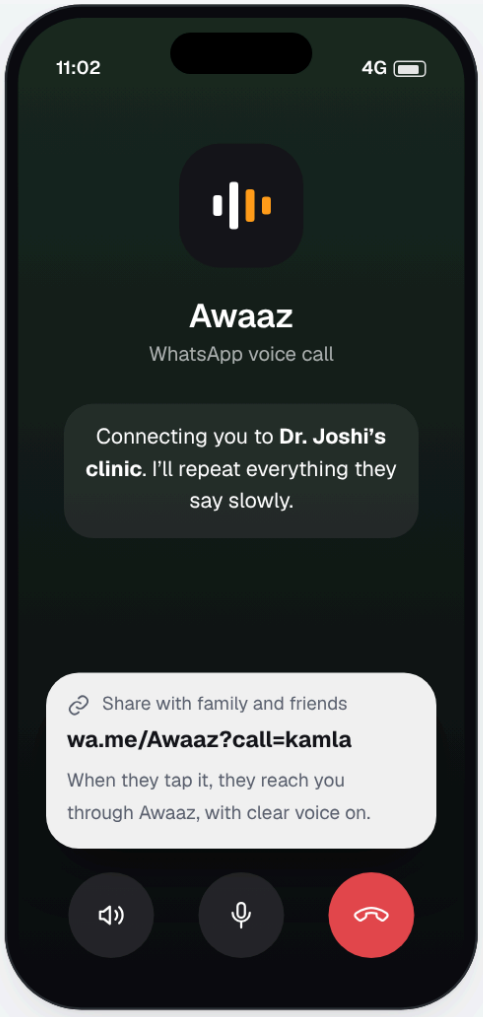

Live relay in a chat

Captions arrive as messages; replies typed in WhatsApp are spoken into the call.

Voice notes, both ways

Forward a voice note to read it. Type a reply to get a voice note in your own voice.

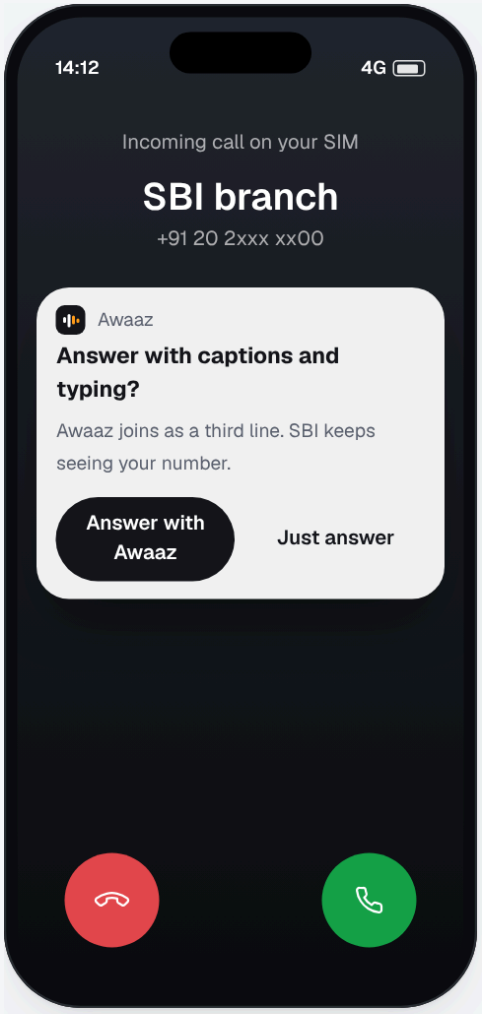

WhatsApp calling

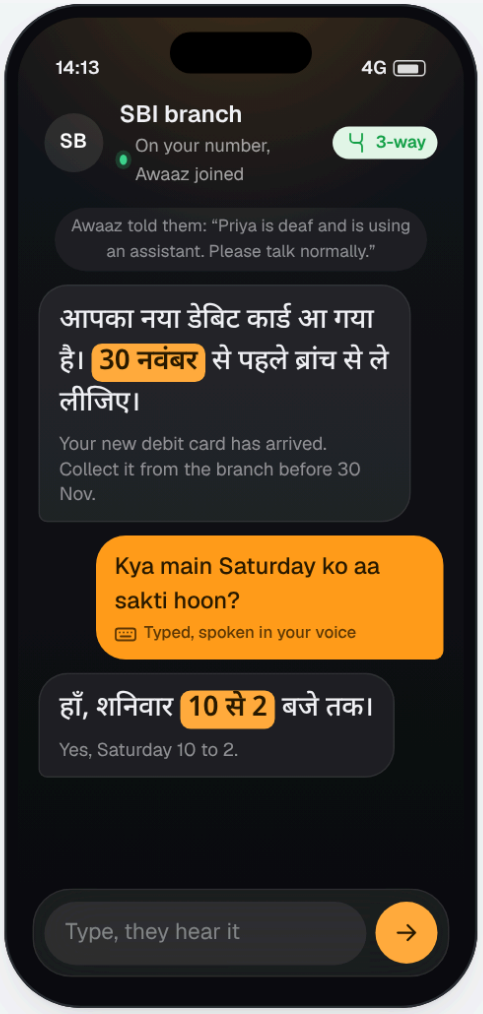

Call Awaaz on WhatsApp (free for you) and it connects your call. Friends can reach you through a link.

My own number

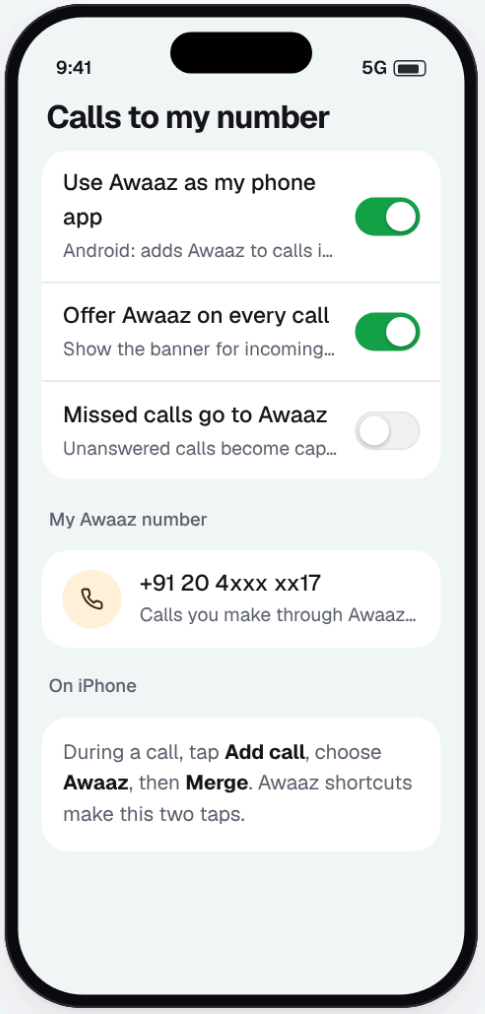

Awaaz joins a normal SIM call as a third line (Android first); settings for numbers and forwarding.

Incoming normal call
Awaaz offers to join before you answer.

Merged call
Captions and typing work on your own number.

Settings
Your own number, your Awaaz number, and missed-call forwarding.

Face to face

Split screen for in-person conversations and speakerphone calls on another device.

Split screen
No phone call needed. Uses the phone's own mic and speaker.

When to use it

- **In person:** pharmacy counter, doctor's room, bank desk, auto-rickshaw.
- **WhatsApp or video calls** on a laptop or second phone: put that call on speaker, keep Awaaz open nearby.
- **Group conversations:** captions show who is speaking.

Calling situations

What works on day one, what needs Android, and what isn't possible.

Situation	How Awaaz handles it	What works	Status
You call a shop, clinic or bank	Awaaz line: the call runs in the cloud	Every way of talking and hearing. They see your Awaaz number	Day one
Someone calls your Awaaz number	Rings the app with flash and vibration	Everything, plus messages taken	Day one
Normal calls on your own SIM	Awaaz joins as a third line and merges	Captions, typing, your voice. Clear-voice repeats are heard by both	Android first
Missed calls on your SIM	Carrier call forwarding to your Awaaz number	Captioned message	Day one
WhatsApp messages and voice notes	Awaaz WhatsApp bot	Read voice notes, reply in your voice, start calls and tasks, live captions in chat	Day one
WhatsApp calls with Awaaz	WhatsApp Business Calling	Call Awaaz free on WhatsApp; it connects your call. Friends reach you via a link	Next
Personal WhatsApp calls with friends	No app can access these calls	Use your Awaaz link instead, face to face mode on a second device, or your phone's built-in captions	Not possible
Talking in person	Face to face mode	Split screen captions and speech	Day one
Phone menus (IVR)	Keypad with spoken options listed	Tap an option, or let Call for me navigate	Day one
Video calls (Meet, Zoom)	Awaaz for desktop: captions from tab audio	Captions and typed replies	Later
Emergency	SOS: alert family with location, full-screen help card	Automated 112 calls need a formal partnership	Card on day one

Integrations

Phone line, in-app calling, Android, iPhone, WhatsApp, Bolna, speech, calendar, wearables, human help, business lines.

Awaaz phone line — Day one

Cloud calls with live two-way audio.

- Plivo: outbound calls with audio streams
- Exotel: personal Indian numbers, incoming calls

In-app calling — Next

Your side of the call runs through the app instead of a phone call.

- WebRTC audio, so clear voice goes straight to Bluetooth hearing aids and headphones
- Falls back to a normal phone call on weak data

Android phone app — Android

Awaaz as your default phone app.

- Adds Awaaz to calls and merges in one tap
- Offers Awaaz on incoming calls
- Needs carrier conference calling

iPhone — Later

Awaaz calls appear like normal calls.

- CallKit for Awaaz line calls
- Manual add-and-merge for SIM calls
- Setup guide for Apple's Live Speech and Personal Voice

WhatsApp bot — Day one

Through WhatsApp Business on Exotel.

- Start calls and tasks by message or voice note
- Live captions as messages; replies spoken in your voice
- Summaries, reminders, family sharing

WhatsApp calling — Next

WhatsApp Business Calling API.

- Users call Awaaz free on WhatsApp
- "Call me via Awaaz" links for friends
- Awaaz calling users back needs their permission

Call for me agents — Day one

Bolna agents run whole calls.

- Approval checkpoints, keypad navigation
- Results back to app and WhatsApp

Speech and voices — Day one

Chosen per language.

- Deepgram Flux and Sarvam Saaras for captions
- Cartesia, Kalpa and Sarvam Bulbul for voices, including cloned voices

Calendar and contacts — Day one

Turn chips into reminders.

- Google Calendar and phone calendar
- Import contacts, add notes per contact

Watches and hearing aids — Later

Feel and hear calls better.

- Wear OS and Apple Watch: buzz when they talk, glance at captions
- Bluetooth hearing aids via in-app calling

Human help — Later

When AI isn't enough.

- ISL video interpreter partners
- Family helper with permission

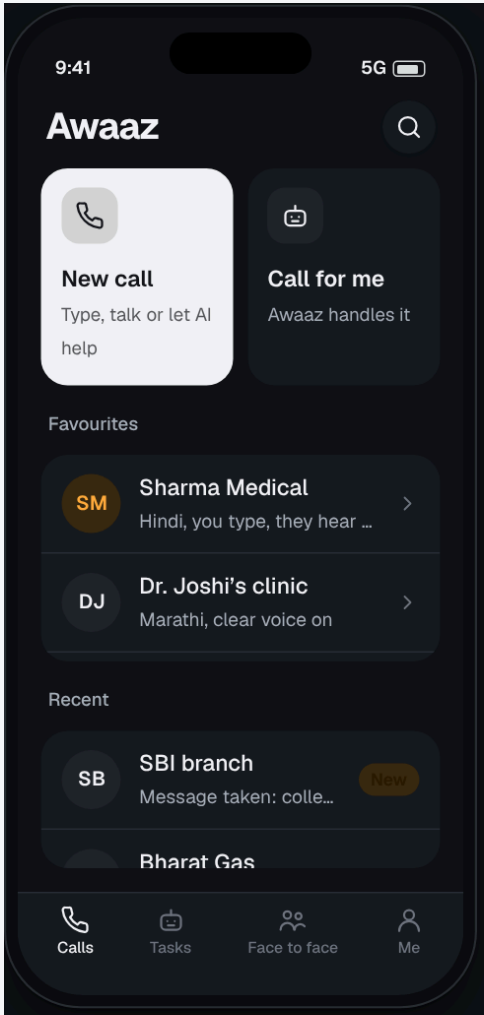

Accessible business lines — Later

For banks, hospitals and telecoms.

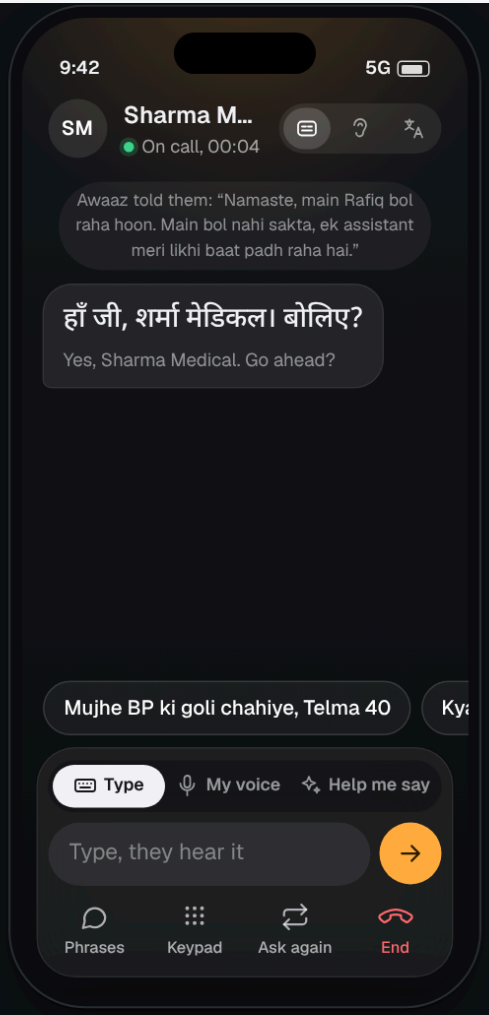

- An Awaaz-powered support number for deaf customers
- SIP connection to existing call centres

Dark mode

Every screen follows the system theme; the call screen is always dark.

Home
Favourites remember each contact's language and how you like to talk with them.
